

● USER GUIDE

Business Presentation *Template 02*

How to edit the deck, the fonts and colour system, how every chart is built, and which slide to use when.

60

slides, 16:9

42

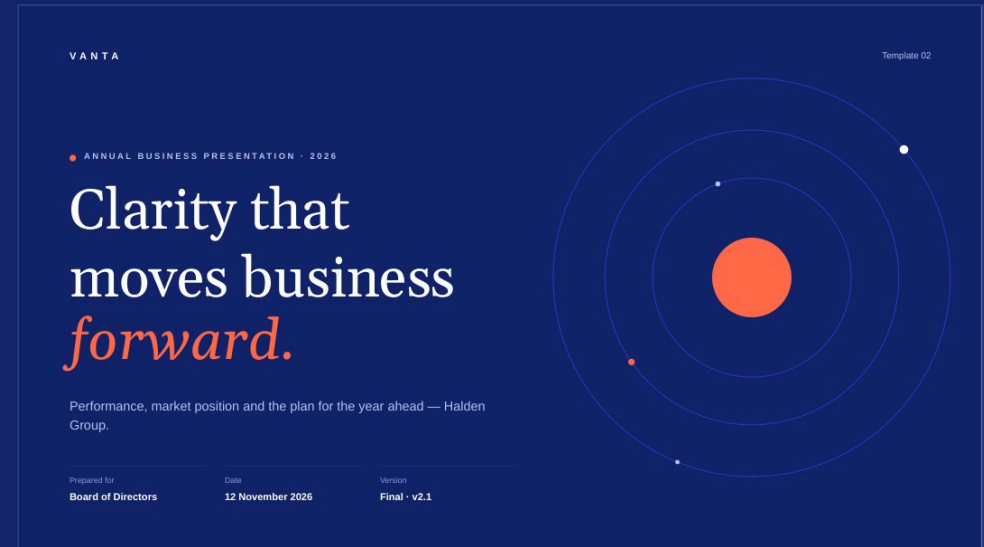

native, editable charts

5

slide masters

0

photographs

Make it yours in six steps

01

Keep the slides you need

Open **View** › **Slide Sorter**, delete what you don't need and drag the rest into your story order. Every slide stands alone.

02

Set your brand colours

Design › **Variants** › **Colors** › **Customize Colors**. Change Accent 1 (Cobalt) and Accent 2 (Coral) first — shapes and text that use theme colours follow automatically.

03

Replace the text

All copy is realistic sample content for a fictional company, “Halden Group”. Click any text and type. Headlines are written as conclusions — keep that habit.

04

Paste in your data

Right-click a chart › **Edit Data**. The chart redraws from the embedded worksheet. See page 5 for the special builds (gauges, funnel, waterfall).

05

Swap the icons

Icons are vector graphics. Recolour with **Graphics Format** › **Graphics Fill**, or replace via **Insert** › **Icons** at the same size.

06

Check and present

Speaker notes on every slide explain what the slide is for and how it is built. Run **Review** › **Check Accessibility** before you share.

FORMAT

16:9 widescreen, 13.333 × 7.5 in

FORMAT

Georgia (headings), Arial (body)

CHARTS

42 native charts on 36 slides, all with embedded data

WORKS IN

PowerPoint for Windows, Mac, web, iOS and Android

Everything is a native, editable PowerPoint object

Slide masters & layouts

Open **View > Slide Master**. Five layouts set the background, footer and slide number:

LAYOUT	USE FOR
Vanta — Ivory	Default content slides
Vanta — White	Data-dense slides, tables
Vanta — Cobalt	Dashboards, key moments
Vanta — Blank Ivory	Statements, full-bleed layouts
Vanta — Blank Cobalt	Cover and closing

Change the footer text once in the master and it updates on every slide. To add a slide in a layout: **Home > New Slide** and pick it.

Text, shapes & tables

- Standard headlines sit in the title placeholder, so they appear in the outline and accessibility tools. Statement, cover and editorial slides use free text boxes.
- Cards, chips, rules and the orbit artwork are plain shapes — resize, recolour or delete them freely.
- Tables are native PowerPoint tables. Add rows with **Layout > Insert Below**; table styles are kept minimal so your data reads first.
- Data bars inside tables (slide 16, 50) are rectangles: width = value ÷ column max × bar length.
- Group related items with **Ctrl/⌘ + G** before moving them.

Good habits

- Use the **Selection Pane (Home > Arrange > Selection Pane)** to find objects; icons are named *Icon <name>*.
- Keep the 0.7 in outer margin and the 12-column grid (0.24 in gutters) when you add content.
- One highlight colour per slide: coral marks the single thing the audience should look at.
- Replace sample numbers everywhere they appear — headline, chart, callouts and notes.
- Paste with **Use Destination Theme** to keep colours and fonts consistent.

NO PHOTOGRAPHY BY DESIGN

The template uses typography, data, icons and geometric artwork only. There are no images of people to replace or license.

Two fonts, ten theme colours

HEADING FONT — THEME “HEADINGS”

Georgia

Headlines, statements, large numerals (italic). Use regular weight; italic coral for numerals.

BODY FONT — THEME “BODY”

Arial

Body copy, labels, KPIs, chart text, tables. Bold for figures; spaced capitals (tracking 1.2–1.8 pt) for eyebrows.

WHY THESE FONTS

Both ship with Windows, macOS, iOS and Android Office, so the deck looks identical everywhere with nothing to install. To rebrand, change them once in **Design › Variants › Fonts › Customize Fonts**.

TYPE SCALE

Statements	44–54 pt
Slide headlines	27 pt
Big KPIs	22–44 pt bold
Body	10.5–12 pt
Labels / eyebrows	8–9 pt

THEME COLOUR SLOTS (DESIGN › VARIANTS › COLORS)

	NAME	HEX	THEME SLOT	ROLE
	Ink	#1A1D23	Text / Background 1 dark (dk1)	Body text, headlines on light slides
	White	#FFFFFF	Text / Background 1 light (lt1)	Cards, chart panels, text on cobalt
	Deep Cobalt	#13246B	Text / Background 2 dark (dk2)	Dark slides, dashboards, emphasis panels
	Ivory	#F8F5EF	Text / Background 2 light (lt2)	Default slide background
	Cobalt	#2340C8	Accent 1	Primary data series, links, key figures
	Coral	#FF6B4A	Accent 2	Highlight: “your company”, the one point that matters
	Sky	#B7C6F5	Accent 3	Secondary series, comparison periods
	Mist	#DCDFE6	Accent 4	Neutral series, tracks, “before” values
	Stone	#6B7080	Accent 5	Captions, axis labels, notes
	Peach	#FFD3C4	Accent 6	Soft highlight fills, warning chips

Shapes and text are mapped to these theme slots, so a new colour set restyles most of the deck in one step. Chart series and icons use the same values as fixed colours; after a colour change, use **Chart Design › Change Colors** or recolour a series with **Format Data Series › Fill**.

42 native charts — edit the data, the chart follows

Editing any chart

- Right-click › **Edit Data** (on mobile: tap the chart › **Edit Data**). Type or paste values; rows and columns map to categories and series.
- **Chart Design › Select Data** to add or remove series.
- Double-click an axis to change minimum, maximum and units; several charts use fixed bounds so similar slides compare cleanly.
- Labels, legends and gridlines: **Chart Elements** (+) on Windows/Mac.
- Where a slide uses its own legend or text labels next to a chart, update them after you change the data — the notes say when.

CHART CATALOGUE

TYPE	#	SLIDES
Area	2	5, 32
Doughnut	6	6, 14, 20 (×3), 56
Bar/column	16	6, 7, 9, 10, 14, 19, 22, 25, 28, 29, 30, 39, 42, 43, 47, 58
Line	7	12, 19, 21, 31, 36, 40, 56
Scatter	1	15
Bubble	2	17, 48
Bar/column + Line	4	23, 27, 33, 41
Area + Line	2	35, 38
Pie	1	37
Radar	1	52

Special builds

Gauges

slide 20

Doughnut with three values: [achieved, remaining, 100]. The third slice is white and forms the hidden lower half. Change only the first two (they must add up to 100).

Sales funnel

slide 29

Stacked bar: an invisible “offset” series centres the visible bars. Offset = (largest value – value) ÷ 2. Stage names are text boxes.

Waterfall

slide 42

Stacked column with an invisible Base series plus Total, Increase and Decrease series. Base = running total before the step (for decreases: after the step).

Highlight series

slides 15, 17, 48

Scatter and bubble charts use a separate series for the highlighted points (coral). Move a row's value into the other series column to change what is highlighted; leave the unused cell blank.

Plan / target lines

slides 19, 27, 33

Combo charts: dashed lines for plan, short markers (line width 0) for targets. Change style in **Format Data Series › Line**.

Secondary axis

slides 23, 35, 41

The line series is on the right axis. Set its bounds independently in **Format Axis**.

Matrices

slides 17, 48

Quadrant fills are rectangles behind a transparent chart; bubble size shows value. Keep axes at 0–100 so quadrants line up.

The building blocks behind every slide

EYEBROW

● MARKET & ANALYSIS

Coral dot + spaced capitals.
Names the section above each headline.

HEADLINE + LEAD

Growth re-accelerated in 2026

Georgia headline that states the conclusion; optional grey lead on the right gives the source or unit.

KPI BLOCK

\$84.2M

▲ 31% YoY — label, figure and change. Used in rails, dashboards and panels.

CHIPS

+7.9% -10.6% Goal

Rounded status labels for change, status and goals.

NUMERALS

01

Italic Georgia in coral for steps, priorities and lists.

PANELS & CARDS

55%

Square-cornered white, ivory, peach or deep-cobalt fills. No borders, no shadows.

ICON DOTS

Phosphor Light vector icons, alone or on a coloured circle.

ORBIT ARTWORK

Concentric rings with satellite dots on cover and closing. Plain shapes.

LEGENDS

■ Revenue — Growth

Custom legends above charts, so they align with the grid.

TABLES

Native tables with a single ink header rule, hairline row dividers and optional in-cell data bars or heat fills.

GRIDS & HEATMAPS

Five-step scales for scores and risk.

LAYOUT GRID

12 columns, 0.7 in outer margins, 0.24 in gutters. Content starts at 1.95 in below the headline; footer at 7.0 in.

Nine chapters you can use whole or mix

CHAPTER	SLIDES	USE IT TO	SLIDES INCLUDED
Introduction	1–5	Open the story: cover, a one-line statement, agenda, the executive summary and the headline numbers.	Cover, Statement, Agenda, Executive Overview, Key Numbers
Company context	6–10	Show what the business is today: snapshot dashboard, growth history, business model, revenue streams and the opportunity.	Business Snapshot, Growth Overview, Business Model, Revenue Streams, Market Opportunity
Market & analysis	11–18	Size the market, segment it, then position the company against competitors with scatter, bubble and benchmark views.	Market Size, Market Growth, Market Segmentation, Market Share, Competitive Landscape, Competitor Comparison, Positioning Matrix, Benchmark Analysis
Data & performance	19–28	Report results: executive and KPI dashboards, monthly, quarterly and YoY trends, regions, products, targets and variance.	Performance Dashboard, KPI Dashboard, Monthly Performance, Quarterly Comparison, Year-over-Year Growth, Regional Performance, Product Performance, Category Ranking, Target vs Actual, Variance Analysis
Sales	29–36	Explain the revenue engine: funnel, pipeline, conversion, channels, forecast, territories, acquisition and retention.	Sales Funnel, Sales Pipeline, Conversion Rate, Revenue by Channel, Sales Forecast, Territory Performance, Customer Acquisition, Customer Retention
Finance	37–43	Walk through revenue mix, profitability, costs, margins, cash flow, the revenue bridge and the five-year outlook.	Revenue Breakdown, Profitability, Expense Structure, Margin Analysis, Cash Flow, Waterfall Analysis, Financial Forecast
Strategy	44–50	Set direction: priorities, SWOT, roadmap, growth levers, opportunity matrix, risks and the action plan.	Strategic Priorities, SWOT, Strategic Roadmap, Growth Strategy, Opportunity Matrix, Risk Matrix, Action Plan
Product & marketing	51–56	Present the offer: modules, product comparison, pricing, features, the marketing funnel and the campaign dashboard.	Product Overview, Product Comparison, Pricing Strategy, Feature Comparison, Marketing Funnel, Campaign Dashboard
Results & close	57–60	Prove it and ask: case study, before/after, key takeaways and the closing call to action.	Case Study, Before vs After, Key Takeaways, Closing
